

- `<head></head>` the head tag is where all of the meta content is included.
- `<meta name="viewport" content="width=device-width initial-scale=1.0">`
 - This meta tag will adapt your content to fit into the size of a mobile website
- `<body></body>` the main content of your website goes inside this element.

```
<div class="container">
  <div id="#Box1">
  </div>
  <div id="#Box2">
  </div>
</div>
```

To create a column effect in the portfolio it is best to create a container first and then insert other elements inside of it. Then `display:float` all items inside the container to line up all elements next to each other.

- When using the anchor element don't forget to close it!
 - `<a>`
- REMEMBER: ALL ELEMENTS ARE SPACE SENSITIVE `< a>` ERROR!
- Use the outline styling to debug spacing and not border styling
